Some tools that I love

Technical Proficiencies

Server Side Technologies

Programming Languages

Ruby, Python, TypeScript

Databases

MySQL, Postgres, Firebase, Google BQ

Libraries and frameworks

Ruby on rails, FastApi, Astro, Nodejs

Client Side Technologies

Programming Languages

HTML, CSS, Javascript

Libraries and frameworks

Bootstrap, React, Backbonejs, Angular,

Tailwind, Gulp, Sass

Development & Operations

SOLID Principles, Git, Jest, Karma, Docker, Redis, Jira, Confluence, Bitbucket, Slack, Github, Trello, Asana

About Me

As a dedicated and sociable software engineer with a proven track record, I thrive on crafting elegant solutions in Ruby on Rails.

Driven by a dedication to maintainable and efficient code, I have led projects in which strategic overhauls and process improvements were implemented, always prioritizing team cohesion. My goal is to improve Ruby on Rails development by applying SOLID principles and modern design patterns, while also exploring innovative areas such as blockchain, machine learning and AI.

I consider myself as a good team player. I am able to adapt and to seamlessly integrate into collaborative environments.

Professional Experience

2023 - 2024: Invoke (Temporal)

Position: Senior Software Engineer

- Optimization of the GitLab CI/CD pipeline, reducing execution time from 45 minutes to 8-9 minutes by streamlining tests and steps.
- Development of new functionalities in Python and FastAPI through hands-on experience.
- Building of a robust proxy server using Rails, Python, MongoDB and AWS SQS.

2021 - 2023: Clickdimensions

Position: Senior Software Engineer

- Enhanced Docker environments for improved development processes.
- Collaboration in the migration from Rails 3 to Rails 4, 5, applying SOLID principles throughout the transition process.
- Extensive work with Resque and initiation of the transition to Sidekiq.
- Performing extensive code refactoring for Rails 4 and Rails 5, optimizing testing procedures with RSpec.

Unfortunately, after a few years, the company decided to migrate from Rails to .NET, prompting me to seek out new horizons.

2019 - 2021: Beruby

Position: Software Engineer

- Contribution to the team in the transition from customized solutions, applying SOLID principles to streamline development.
- Integration of more than 20 different REST API clients (Lidl, Booking, Aliexpress, Fnac, etc.)
- Successful creation of an application using React for both iOS and Android platforms.

After my time at Beruby, I decided to change companies because they offered me a better salary and a place to grow as a Senior Ruby on Rails Engineer.

2017 - 2019: 2bedigital

Position: Junior Ruby on Rails Developer

- Design of Shopify-style templates for e-commerce clients using Ruby on
- Rails and Solidus, ensuring adherence to SOLID principles and clean code.
- Demonstrated proficiency in RoR and JavaScript for web development.

I decided to move to Beruby after their decision to switch to a PrestaShop and Shopify format, where my skills as a developer were not needed.

Education

Official Education

- Bachelor's Degree in Computer Eng
- Multiplatform Application Technician DAM

Certifications

- React - Become an expert in React
- GoRails - Behind the Scenes
- Azure Essentials Certification
